

SPILL RESPONSE SAFETY TRAINING

Industrial Safety Trainers Inc. provides a comprehensive Spill Response training program that is suitable for all facilities in the manufacturing sector.

Spills of oil and other hazards materials are a constant threat. The occurrence of such spills is an increasing concern to our environment.

The necessary factors for an effectively managed environmental emergency program include:

Prevention, Preparedness, Response and Recovery

- Prevention provides the ability to anticipate, prevent or reduce the probability of the accidental release of a substance
- Preparedness to establish the ability to respond to such events
- Response to undertake timely actions to stop the release and minimize the effects.
- Recovery to restore the environment, which includes improvement measures and compensation for environmental damages.

COURSE LENGTH: 3 hours

COURSE INCLUDES: Training Manuals, Certificate, Records of Training, Attendance Record, Tests

LOCATION: Training sessions are available onsite at your facility, publically across Ontario, or our state of the art training facility. If your facility does not have access to a boardroom, IST has a mobile classroom called the Safety Bus. Please contact our office for more detailed information about training formats and date availability.

PRICE: \$75.00 per person *plus HST

COURSE CONTENT

- Definitions
- Responsibility for reporting and clean up
- Assessment of Hazards
- Environmental Risks
- Disposal
