Bus

Our train the trainer programs provide your in-house trainers with the knowledge skills and tools to effectively train your operators and evaluate their competence.

Prerequisite for Train the Trainer Program

Participants must hold a valid Working at Heights safety training certificate

COURSE CONTENT

- ◆ Construction Safety Trainers Working At Heights Course has been approved for training in Ontario. The hard work is done, all you have to do is submit our program to the MOL and once approved, start training your own workers
- ◆ We will teach you how to deliver this remarkable program. We will walk you through the MOL application process and support you afterwards
- ◆ Day 1 and 2 - We will walk you through each page of the Working At Heights program, discussing how to effectively deliver each section including workshops.
- ◆ Day 3 - Participants will have the opportunity to practice their new skills. We will also provide you with an application to the MOL so that you can get started on getting your company approved to deliver this course. We will walk you through each step of the process, provide you with the policies and procedures you will need as part of the application process. The time required for this is 8 hours.
