

# AERIAL DEVICE RESCUE TRAINING

max. 12 participants

REFRESHER

## LOCATION:

On-Site

Classroom  
Facilities

Safety  
Bus

## COURSE CONTENT

Part One:

- ◆ Discuss what situations would warrant a rescue to take place in your workplace
- ◆ Discuss the types of rescue equipment that are available and how to inspect them

Part Two:

- ◆ Review the specific rescue equipment that your workers will be using, including how to inspect and use it
- ◆ We will get each participant to lower themselves from the aerial device they will be using

Practical evaluations on our equipment using our rescue equipment can be arranged. Prior to the course, one of our consultants will discuss with you the best approach to the rescue training for your staff. Participants of this course **must have** a valid Working At Heights or Fall Arrest/ Fall Protection certification as applicable to the environment where the rescue is taking place.
